

Electrified motorsport at the Nürburgring RCN Green Challenge 2023

After the successful 2022 season, the **RCN Green Challenge** will again be announced for all GLP rounds in the 2023 season. The regulations created in cooperation with the ADAC and the DMSB, especially for purely electrically powered vehicles, have proven to be very successful. In addition, the great interest clearly shows that the new series is well received by the drivers.

The GLP principle "Ingeniously simple - simply ingenious" also applies to the **Green Challenge**! The competition for e-cars covers a distance of six laps on the traditional Nürburgring Nordschleife (one lap corresponds to 20.83 kilometers, total distance approx. 125 kilometers).

Terms of reference of the **Green Challenge**

- Introductory lap
- Seed time round
- 1st confirmation round
- 2nd confirmation round
- 3rd confirmation round
- Run-out round

The self-selected time of the setting time round must be repeated in each of the following three confirmation rounds without grace. For each 1/100 second deviation from the setting time, the team receives 0.1 penalty points. The winner is the team with the lowest number of penalty points. The e-vehicles must be road legal and the driver and co-driver need an approved helmet for the event.

In the daily ranking the best placed 30 percent of the participants will receive trophies. Further prizes will be awarded during the GLP annual awards ceremony.

The detailed announcement is published on www.rcn-glp.de. There, interested parties can register for the **Green Challenge** via the GLP homepage and secure a starting place.
